GOG electrical

ZHEJIANG GENO ELECTRICAL CO., LTD, founded in 2010, is a national high-tech enterprise focusing on household appliances and aesthetic lighting, integrating R&D, manufacturing, trade, service and other functions. The registered capital of the company is 106 million yuan, the plant construction area is more than 100,000 square meters, and more than 2,000 employees.

Main products: switch socket, lamps and lighting, Integrated bath heater, intelligent switch panel, hospital and hotel intelligent, **electrical accessories and other 50 series of more than 1000 varieties of products**, the annual sales of more than 500 million sets, products sold in more than 30 countries and regions around the world.

With a nationwide layout and coordinated development, Geno owns three major automation industry production bases, Wenzhou Electrical production base, Zhongshan Lighting production base and Jiaxing Integrated bath heater production base. It has many subsidiaries including **Geno Electrician, Geno Lighting, Geno Household, Geno Plastic, Geno Alloy, Geno IOT and so on.**

HONOR

Partial

International specialized and special new small giant enterprise
National high-tech enterprises
Zhejiang manufacture "quality" word certification
High performance smart electrical switch Research Institute
Postdoctoral workstation
Scientific and technological innovation enterprise
President Company of Longwan Electrical Appliance Association

QUALIFICATION

Partial

China Green Product Certification
International laboratory accreditation Certificate - CNAS certification
China two integration management system evaluation certificate
ISO 90012015 Quality Management System Certification
ISO 140012015 Environmental Management System certification
ISO 0450012018 Occupational Health and Safety management system certification
AAA level abided by the contract and credit enterprises

PATENTS

Partial

Self-resetting Wall Switch (Invention patent)
Smart control 5 pin socket sensor lamp (Invention patent)
A multifunctional socket capable of adjusting distance (Invention patent)
A power socket with an replaceable sockets modules (Invention patent)
A method for assembling a connect switch base (Invention patent)
A new type of panel (Invention patent)
A smart socket with sensor footlight (invention patent)

GOG electrical

Global Open Genuine

Mission

Deliver safety to hundreds of millions of families around the world

Create value for customers

Help employees develop, Make positive happiness for society

Values

Customer first,
high efficiency, innovation
integrity, responsibility, equality

Product Rear Seat Display

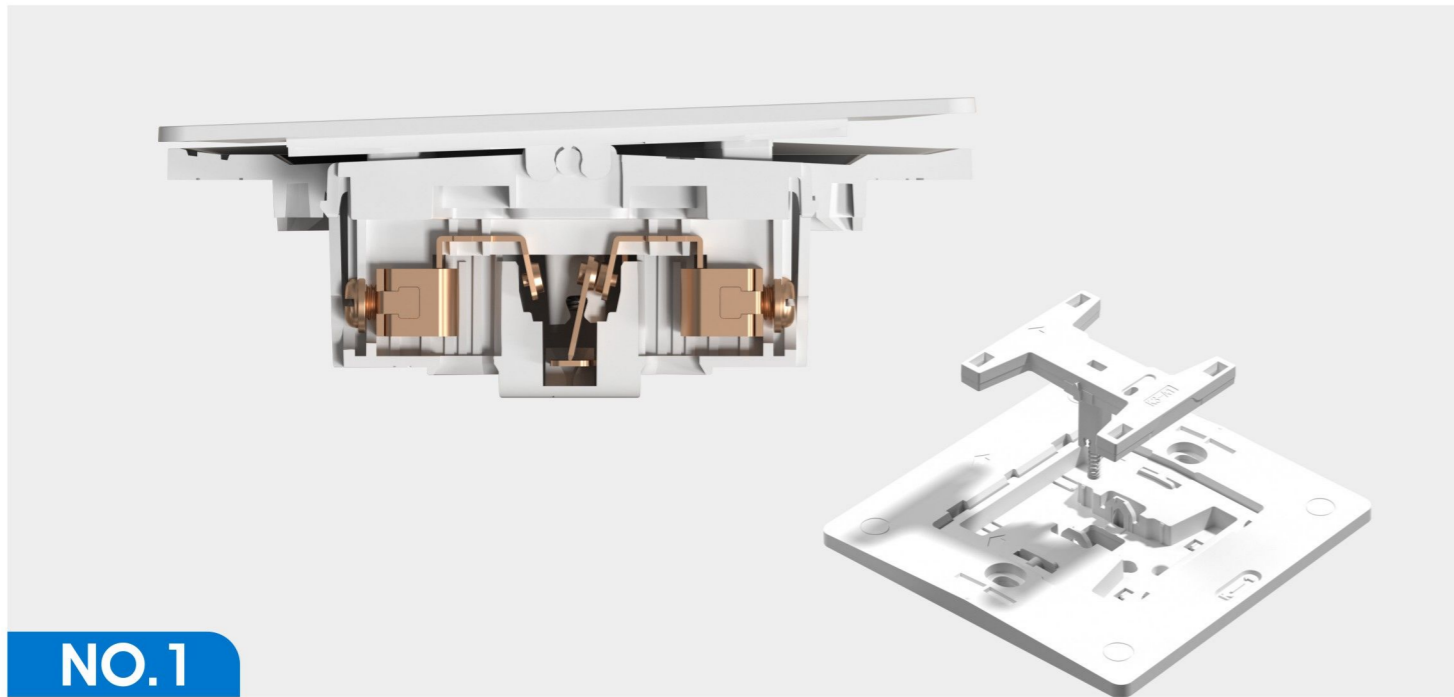

Hot Riveting Metal Plate Base

Steel-plastic structure connected by hot riveted iron plates. The deformation of the base is effectively controlled even during violent installation, which greatly improves the overall safety and safety, preventing the switch from being inoperable due to improper installation.

Full Plastic Base

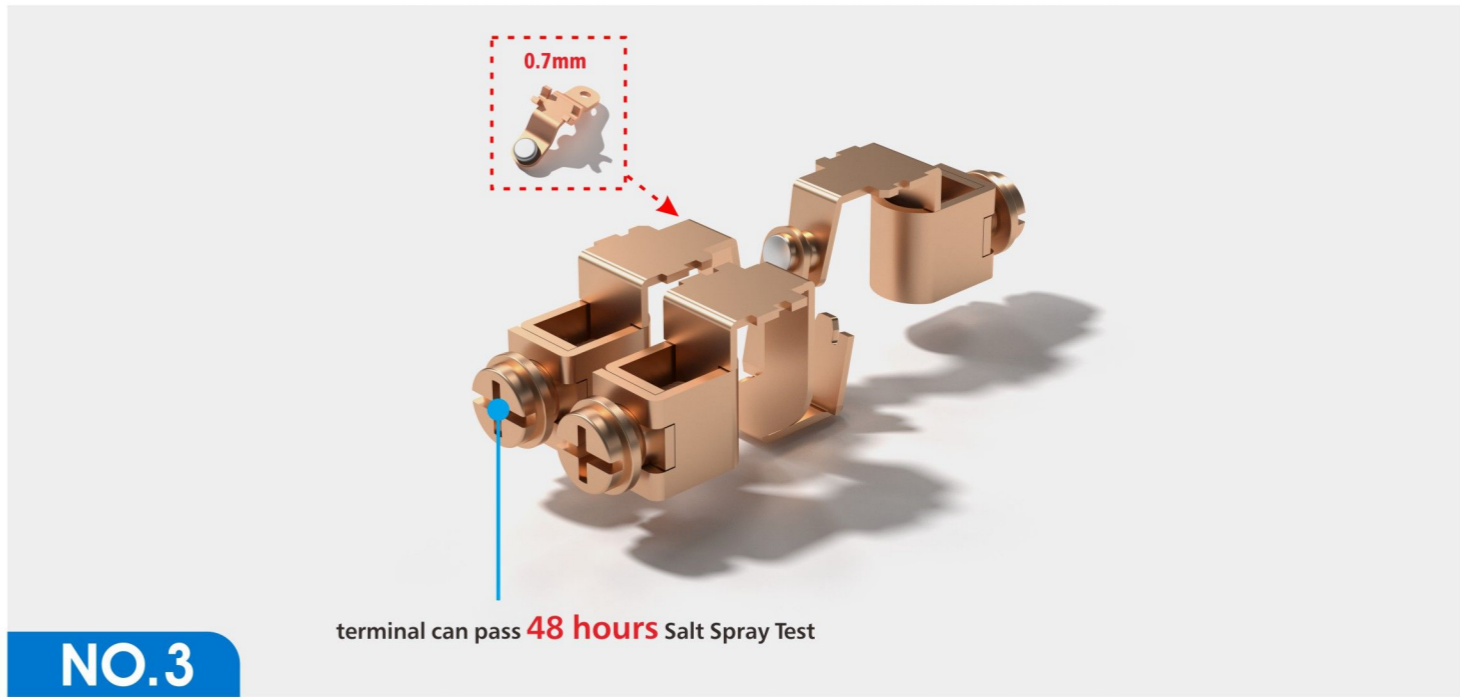

Abandon the traditional buckle design, all-plastic connecting center plate back base structure. The deformation of the base is effectively controlled even during violent installation, which greatly improves the overall safety and safety, preventing the switch from being inoperable due to improper installation.

NO.1

VERTICAL STRUCTURE

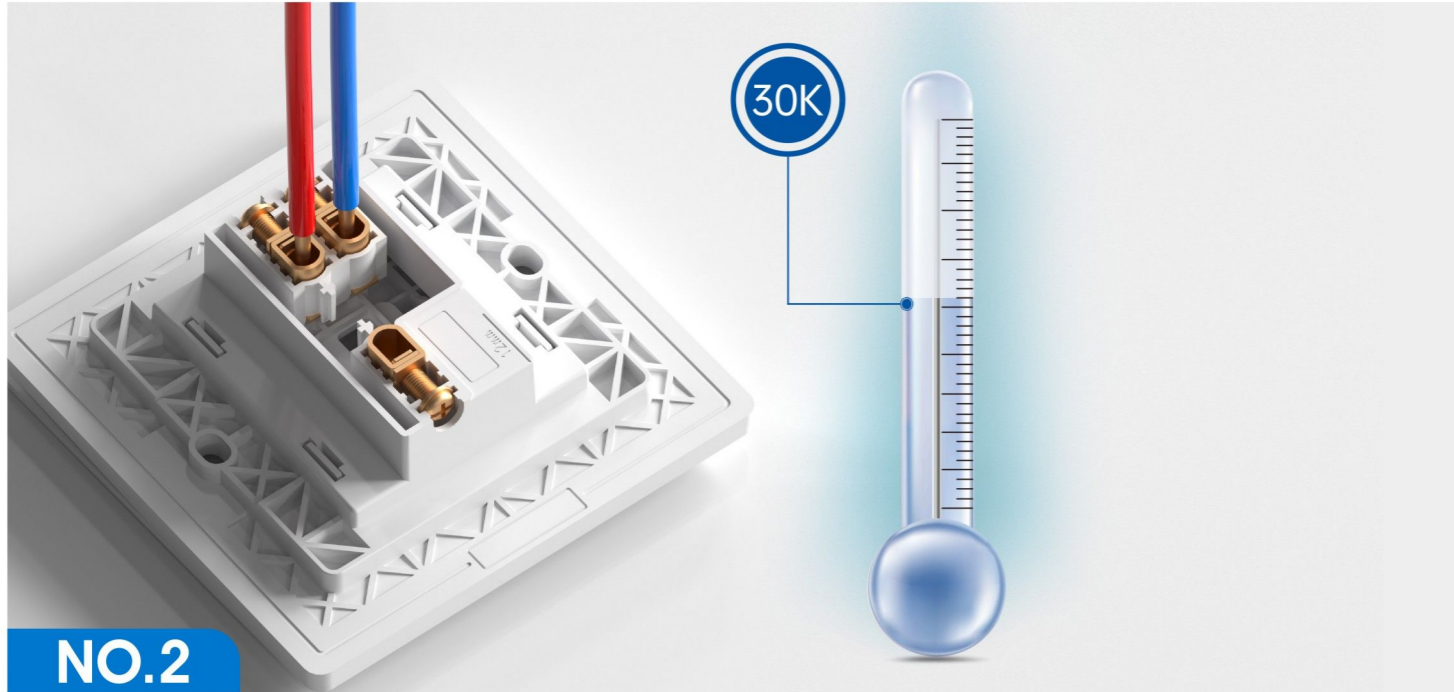

The movable contact and the stationary contact are engaged by pressing a spring, enabling the switch to open and close. The mechanical switch lifetimes can reach up to **200,000** cycles, significantly extending the service life. It is **5** times the conventional IEC standard.

NO.3

STANDARD:

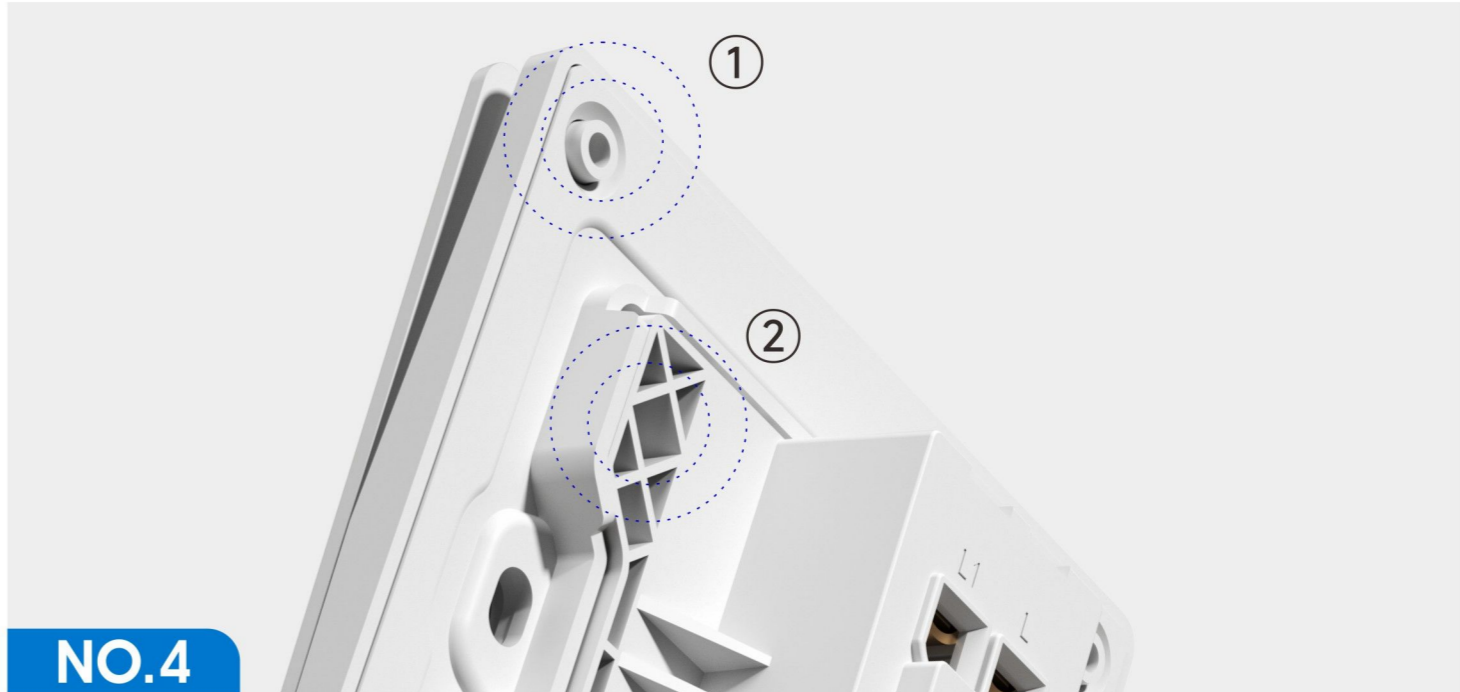

switches typically offer higher durability and reliability, providing better protection against overloads and short circuits, which enhances electrical safety. They can withstand high inrush currents, making them suitable for controlling high-power devices like crystal chandeliers and high-wattage LED lights.

NO.2

TEMPERATURE RISE PERFORMANCE.

According to test results, the temperature rise of our switches is only **30K**, significantly lower than the IEC standard of 45K. This means our switches generate less heat during high current or prolonged use, greatly enhancing safety and reliability.

NO.4

- ① The "hot riveting" technology for the base abandons the traditional buckle structure and connects the base to the middle frame using hot riveting. During installation, even if the base plate deforms, the overall shape will not undergo significant changes, greatly enhancing overall safety performance.
- ② Integrated base and middle plate structure with strengthen honeycomb base support high quality for products.
